

Simon Lisciecki Biography

Simon Lisiecki was born in a remote corner of South Africa to a Polish father. He went on to become a ship captain and explored the world. After commanding oil tankers during the Gulf War, he decided it was time for more mundane employment. So, he moved to Alaska where he worked on the Exxon Valdez oil spill. He parlayed that experience into becoming president of a shipping company and was later promoted to the London headquarters. Following six years working in London, he retired, and with his wife Petra set out on a journey to discover his Polish roots. Today, he dedicates his time to travel and his lifelong passion for writing.
